

# FileCloud – Enterprise File Sharing

Self-Hosted, White-Label, Enterprise File Share, Sync and Mobile Access Solution, now with Wasabi S3 as Managed storage.

Looking to run your own end-to-end Enterprise file share and sync solution in a secure cloud storage hosted within your region? Checkout FileCloud's Wasabi S3 integration!

What if you could store all of your data in a cloud solution affordably?

FileCloud's integration with Wasabi S3 provides a simple way for businesses and managed service providers to run their own branded, enterprise file sharing and sync solution in a secure cloud storage with low prices.

- Secure file sharing and anywhere access to organization data
- Secure endpoint backup and data leak prevention
- Total visibility and control over organization data
- Branded file sharing to broadcast organization brand
- Wasabi provides S3 for Europe region hosted

## File Sync and Sharing

- **Cloud Storage that make tiers invisible and data storage affordable**
- Offline sync to smartphones
- Cross platform- supports Windows, Mac and Linux

## Security and Efficiency

- **All data is treated equally and made readable accessible**
- Durable and highly available secure cloud storage with no tier-based latency delays.
- Biometric readers for access and at least two factor authentication

## Simple Pricing

- **1/5<sup>th</sup> the cost, up to 6x faster**
- \$.0059 per GB/mo. (\$5.99 per TB/month)
- No additional charges for egress or API requests
- FileCloud Server 20/Users \$999/Year

We like the idea of controlling our own cloud instead of allowing a third party to do it for us. FileCloud offered us the best of both worlds. We have control of our data, and our blind board members and volunteers can all access what they need easily and efficiently

- Norma Crosby, IT Manager, National Federation of the Blind of Texas.
